
Overview**Useful For**

High-resolution accurate mass method to qualitatively (present vs. not detected) identify 27 benzodiazepine compounds (parent drug and metabolites) in urine to help determine compliance or identify illicit benzodiazepine drug use

Method Name

Only orderable as part of profile. For more information see:

CSMP / Controlled Substance Monitoring Panel, Urine

TBSU / Targeted Benzodiazepine Screen, Urine

Liquid Chromatography-Tandem Mass Spectrometry, High Resolution Accurate Mass (LC-MS/MS HRAM)

NY State Available

Yes

Specimen**Specimen Type**

Urine

Specimen Required

Only orderable as part of profile. For more information see:

CSMP / Controlled Substance Monitoring Panel, Urine

TBSU / Targeted Benzodiazepine Screen, Urine

Supplies: Aliquot Tube, 5 mL (T465)

Collection Container/Tube: Plastic urine container

Submission Container/Tube: Plastic, 5-mL tube

Specimen Volume: 3 mL

Collection Instructions:

1. Collect a random urine specimen.
2. No preservative

Specimen Minimum Volume

1 mL

Specimen Stability Information

Specimen Type	Temperature	Time	Special Container
Urine	Refrigerated (preferred)	14 days	
	Frozen	28 days	
	Ambient	72 hours	

Clinical and Interpretive

Clinical Information

Benzodiazepines represent a large family of medications used to treat a wide range of disorders from anxiety to seizures and they are also used in pain management. With a high risk for abuse/diversion, professional practice guidelines recommend compliance monitoring for these medications using urine drug tests. However, traditional benzodiazepine immunoassays suffer from a lack of cross-reactivity with all the benzodiazepines, so many compliant patients taking clonazepam (Klonopin) or lorazepam (Ativan) may screen negative by immunoassay, but are positive when confirmatory testing is done. The new targeted benzodiazepine screening test provides a more sensitive and specific test to check for compliance to all the commonly prescribed benzodiazepines and looks for both parent and metabolites in the urine.

Reference Values

Only orderable as part of profile. For more information see:

CSMP / Controlled Substance Monitoring Panel, Urine

TBSU / Targeted Benzodiazepine Screen, Urine

Not Detected

Cutoff concentrations:

Alprazolam: 10 ng/mL

Alpha-Hydroxyalprazolam: 10 ng/mL

Alpha-Hydroxyalprazolam Glucuronide: 50 ng/mL

Chlordiazepoxide: 10 ng/mL

Clobazam: 10 ng/mL

N-Desmethyloclobazam: 200 ng/mL

Clonazepam: 10 ng/mL

7-aminoclonazepam: 10 ng/mL

Diazepam: 10 ng/mL

Nordiazepam: 10 ng/mL

Flunitrazepam: 10 ng/mL

7-aminoflunitrazepam: 10 ng/mL

Flurazepam: 10 ng/mL

2-Hydroxy Ethyl Flurazepam: 10 ng/mL

Lorazepam: 10 ng/mL

Lorazepam Glucuronide: 50 ng/mL

Midazolam: 10 ng/mL

Alpha-Hydroxy Midazolam: 10 ng/mL

Oxazepam: 10 ng/mL

Oxazepam Glucuronide: 50 ng/mL

Prazepam: 10 ng/mL

Temazepam: 10 ng/mL

Temazepam Glucuronide: 50 ng/mL

Triazolam: 10 ng/mL

Alpha-Hydroxy Triazolam: 10 ng/mL

Zolpidem: 10 ng/mL

Zolpidem Phenyl-4-Carboxylic acid: 10 ng/mL

Interpretation

If a benzodiazepine or its corresponding metabolites are identified (present), it indicates that the patient has used the respective benzodiazepine in the recent past. The absence of expected benzodiazepines or their metabolites may indicate noncompliance, inappropriate timing of specimen collection relative to drug administration, poor drug absorption, diluted or adulterated urine, or limitations of testing. The concentration of the drug must be greater than or equal to the cutoff to be reported as present. If a specific drug concentration is required, the laboratory must be contacted within 2 weeks of specimen collection/testing to request quantification by a second analytical technique at an additional charge.

Performance

Method Description

The urine sample is diluted with internal standard for detection by an high resolution-accurate mass orbi-trap detector.(Unpublished Mayo method)

PDF Report

No

Day(s) and Time(s) Test Performed

Monday through Saturday

Analytic Time

3 days

Maximum Laboratory Time

5 days

Specimen Retention Time

14 days

Performing Laboratory Location

Rochester

Fees and Codes

Fees

- Authorized users can sign in to [Test Prices](#) for detailed fee information.
- Clients without access to Test Prices can contact [Customer Service](#) 24 hours a day, seven days a week.
- Prospective clients should contact their Regional Manager. For assistance, contact [Customer Service](#).

Test Classification

This test was developed and its performance characteristics determined by Mayo Clinic in a manner consistent with CLIA requirements. This test has not been cleared or approved by the U.S. Food and Drug Administration.
